Profile

ISTQB-certified QA Automation Engineer with commercial experience building and maintaining playwright test frameworks, API testing, and integrating automated tests into CI/CD pipelines. Strong background in both manual and automated testing, with hands-on experience validating REST APIs, performing JSON schema validation, and ensuring robust error handling. Comfortable working across frontend and backend systems, enabling effective collaboration with developers to deliver reliable, high-quality software.

Technical Skills

Playwright, TypeScript, JavaScript, API Testing, Postman, REST APIs, Docker, SQL, Git, Jira, CI/CD, (GitHub Actions), React, Next.js, Spring Boot, HTML, CSS, Python

Work Experience

Appatree Ltd – Junior Full Stack Developer and Tester

Oct 2024 – Present

- Developed and maintained end-to-end Playwright automation suites covering UI flows, regression scenarios, and data-driven tests
- Built reusable page object models and helper utilities, improving maintainability and reducing duplicated test code
- Performed API testing using Postman, validating REST endpoints through CRUD operations, JSON schema validation, and error handling
- Built and tested backend services using Spring Boot with Dockerised databases
- Integrated automated tests into CI/CD pipelines (GitHub Actions), enabling execution on every commit and pull request with reporting via Allure
- Collaborated with developers to triage defects, perform root-cause analysis, and verify fixes before release
- Worked with cloud-based environments and AWS credentials to run tests and validate production-like systems

Fini.ac – QA Tester (Freelance)

Oct 2025 – Nov 2025

- Configured and managed role-based permissions in Salesforce to support secure user access
- Designed and executed Playwright UI automation tests focused on permission-based behaviour
- Identified and reported defects related to access control, UI inconsistencies, and edge cases

Hi-Tech Plus – Manual Tester

Jan 2024 – Apr 2024

- Designed and executed manual test cases across production web applications
- Automated repetitive scenarios using Playwright to reduce manual testing effort
- Logged and tracked defects in Jira with clear reproduction steps, improving developer turnaround time
- Tested authentication flows, backend validations, and multi-tenant environments
- Contributed to Agile/Kanban workflows including sprint planning and QA prioritisation

Education and Certifications

ISTQB Software Testing Foundation Qualification – Learning People	<i>Jun 2023 – Sep 2023</i>
CS50: Introduction to Computer Science – Harvard University	<i>Sep 2023 – Jan 2024</i>
Full-Stack Engineer Path – ITCareerSwitch / Codecademy	<i>May 2024 – Sep 2025</i>
BSc (Hons) Mathematics – University of Brighton Second Class Honours (Upper Division)	<i>Sep 2020 – Jul 2023</i>

Projects

API Testing with Docker and Postman

- Built RESTful APIs using Spring Boot with Flyway-managed database migrations and Dockerised databases
- Performed API validation using Postman, covering CRUD operations, JSON schema validation, and error handling
- Created frontend pages consuming APIs to validate full integration flows
- Developed data-driven Playwright tests with screenshots, videos, and reporting via Allure
- Integrated automated tests into CI/CD pipelines for execution on each push to main
